User Manual - Employee

Introduction

Our HRIS/Employees menu is a secure portal designed to manage both work-related and private employee information. Here, you can easily encode details ranging from job roles, performance data, and work schedules to personal records and sensitive data. With advanced security measures in place, private information is accessible only by authorized personnel, ensuring compliance and utmost confidentiality. Enjoy a user-friendly interface that combines efficiency with the highest standards of data protection.

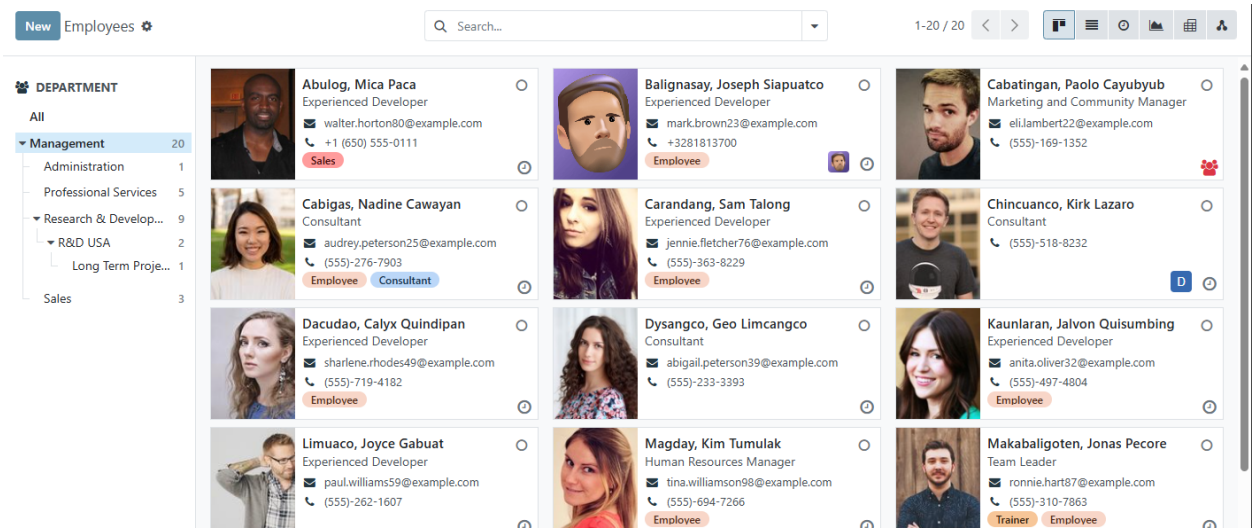

Figure 1: Employees

Work Information

On this tab, you can configure essential work-related details such as the work address, location, and designated approvers for timekeeping, time off, and attendance requests. Additionally, you can set up shift schedules and employee working hours. A snapshot of the organization is also displayed, highlighting the employee's managers and/or subordinates.

Private Information

This section securely stores private employee data, accessible exclusively to authorized users. It contains personal details such as home address, personal email and phone numbers, government ID numbers, and bank account information. Additionally, it includes hiring details, family background, education, nationality, gender, date of birth, age, place of birth, and emergency contact information.

Payroll Settings

In this tab, you can configure all the essential payroll parameters, accessible only to users authorized to manage the payroll register. You can specify an employee's salary as either a monthly or daily rate, set voluntary HDMF deductions, and define the EMR or the total number of working days in a year.

Additionally, you can set up taxable deminimis benefits or other allowances that are deducted with every pay date. Salary increases are also recorded here, including prorated adjustments for increases implemented mid-pay period.
