User Manual - Payroll

Introduction

A fast, automated solution that generates payslips for all employees with just one click. In a matter of minutes, it consolidates data from time cards, time off, and user-defined compensations to accurately compute each employee's pay. The system automatically applies government-mandated benefits and deductions using BIR, SSS, HDMF, and Philhealth compliant formulas.

Additionally, it features integrated loan management, automatically deducting the set amortization amount on each payslip until the loan is fully repaid. This seamless process ensures efficiency and accuracy, making payroll processing effortless.

Creating a new Payroll Register

1. On Payroll menu click **NEW**.
2. An new register will be created. Type in the **Payroll Number**. Then the **Date Range** where the data from time cards will be taken.
3. After click **Gen Payslips** to create payslips for active employees.
4. Then after awhile, created payslips for the employees will be shown.

Payslip

In the register, you can access an individual payslip by simply clicking on its corresponding entry. Each payslip offers a comprehensive breakdown of compensations sourced from time card data and deminimis settings, with taxable amounts clearly identified. Deductions are displayed as well, calculated using table-based formulas that comply with BIR, SSS, HDMF, and Philhealth standards, along with details on any loan amortizations. Additionally, these payslips can be printed for employee distribution.

Reports

The system generates comprehensive reports directly from payroll processing. It automatically produces annualization summaries, BIR 1601C and BIR 1604C reports, Payroll Variance Reports, detailed Compensation and Deduction reports, monthly Government Mandated Benefits Reports, and accurate Loan Payment records.

Annualized BIR 1604C / Form 2316

One of the standout features of our system is its automated annualization process, which includes the generation of BIR 1064C and individual Form 2316 reports for every employee. The system imports data from the entire year's payslips and consolidates it to produce Schedules 1 and 2 for BIR 1604C. Fully compliant with BIR's Alphalist Software, our platform can export DAT files that are readily validated by the BIR Validation Software and can be directly submitted to the BIR.
